

**ABSTRACT**

[SUMMARY]

[OBJECT]

To allow large capacity and high quality software  
5 to be downloaded at low cost and high speed.

[MEANS FOR SOLVING]

In a system that allows only a user terminal 3  
that has been authenticated with authentication  
information to watch a program broadcast from a  
10 broadcasting station 1, it broadcasts software that the  
user terminal 3 needs to download along with the  
authentication information of the user who needs to  
download the software. When the user terminal 3 has  
been authenticated, it downloads the software.
